DERMAPEEL PRO
THE FIRST SEQUENCED MULTI-LAYERED PEELING*

PIGMENTATION AND WRINKLES · NON INVASIVE · NO DOWNTIME

* By Skeyndor
DERMA PEEL PRO

THE NEW GENERATION OF COSMECEUTICAL PEELS WITH IMMEDIATE RESULTS FOR SKIN IMPERFECTIONS WITHOUT DOWNTIME
DERMA PEEL PRO

MULTILAYER SEQUENTIAL TECHNOLOGY

5 PEELING TECHNIQUES FOR THE PERFECT SKIN

HIGH CONCENTRATION OF ACTIVES FOR BETTER EFFICIENCY AND RENOVATING PERFORMANCE

TWO TYPES OF PROFESSIONAL TREATMENTS TO TREAT WRINKLES AND PIGMENTATIONS

UNIQUE SKEYNDOR METHOD

HOME TREATMENT PRODUCTS FOR DAILY USE
MULTILAYER SEQUENTIAL TECHNOLOGY

TREATMENT PHASES: PRE · PEEL · POST

DERMAPEEL PRO has been developed by multilayer sequential technology combining 5 peeling techniques with high acid concentrations in order to eliminate external skin layers; with a goal to achieve optimum results for the perfect skin.

The application of DERMAPEEL PRO is performed by different phases during the treatment to obtain the maximum results.

PRE PHASE skin preparation
PEEL PHASE intensive treatment
POST PHASE skin recovery

| Abrasive & sonic | - Microabrasive peeling  
- DP Plus 110 | The most external skin layer. Cornea stratum. | Immediate Non scaling Perfect skin tone | Very intense | Low |
| Acids & enzymatic | - Timeless /Brightening Acid Peel  
- Enzymatic Peel | External skin area. Granular, spinosum stratum. | Immediate brightening Moisturising Pore minimization Short-term renovating results in 1 to 2 weeks | Intense | Possible irritation; photosensitizing |
| Biological | - Timeless /Brightening Biological Peel | On external skin layer, without mesoscience. On middle skin layer, with mesoscience Germinative stratum, papillary dermis. | Short/medium results Renovation 3 to 4 weeks | Medium | Non-existant |
PEELING ACIDS

Acids are the substances that can reduce skin’s pH level due to the acid group (-COOH). In cosmetics acids are used to:

**In low concentrations or high pH (+4.5),** acids moisturize the cornea stratum and help remove dead cells, smoothing the external micro-prominences of the skin.

**In high concentrations and low pH (-4.5)** acids increase natural renovating speed in external skin layer and stimulate the synthesis of the extracellular matrix components of the skin (hyaluronic, collagen, elastine); smoothing the appearance of aging signs (external pigmentation, thin wrinkles, and small scars).

**ALFA-HIDROXIÁCIDOS (AHA)**

- Clycolic, Lactic, Mandelic, Citric
- Higher capacity of penetration.
- Higher renovating stimulus of the skin.
- Brightening effect and immediate anti-wrinkles.

**POLI-HIDROXIÁCIDOS (PHA)**

- Cluconic, Gluconolactone
- Higher moisturizing capacity.
- Higher biocompatibility.
- Antiaging effect.

**POLI-ÁCIDOS (PCA)**

- Citric, Fitic
- Higher antioxidant effect.
- Higher capacity of Melanine inhibitor.
- Brightening effect.
Liposome encapsulated. Biological exfoliant. Specially weakens the desmosomal cohesion of the skin without harming it.

Hydrogenated liposome encapsulated. Biological despigmentation. Direct action on the cells to reduce the production of pigmentation. Efficient on skin pigmentation as well as progressively brightens the natural skin tone.

TIMELESS PEEL SEQUENTIAL SYSTEM
WRINKLE DIMINISHING TREATMENT

MICROABRASIVE PEEL ULTRASOUNDS

Micro-dermoabrasive gel designed to exfoliate the most external layer of the cornea stratum by mechanical action. Cleanses, purifies, and prepares the skin for the treatment with higher penetrating exfoliating agents.

Main actives: Diamond micro-particles.

TIMELESS ACID PEEL

AHA concentrated solution which activates the natural degradation of the inter-cellular unions of the dermis. It accelerates the renovation of the external layer of the skin and smoothes the micro-relief.

Main actives: Glycolic 25%, Lactic 15%, Mandelic acids 10% pH 3.3

ENZYMATIC PEEL

Enzyme solution which dissolves the main component of the corneocytes - keratine- reducing the thickness of the external layer of the skin.

Main actives: protease, lysozyme.

TIMELESS BIOLOGICAL PEEL

Biomimetic eptide concentrated solution that weakens the inter-cellular unions of the most internal layers of the epidermis. It stimulates the renovation of epidermis at the deep skin layers to stimulate the creation of new skin cells.

Main actives: Biomimetic peptide DSG encapsulated in liposomes.

WRINKLE DIMINISHING TREATMENT

POST-PEEL NEUTRALIZING MASK

Neutralizing mask for to rebalance skin’s PH after the treatment with AHA, and to inhibit the activity of enzymatic agents. Its refreshing texture immediately soothes the skin.

Main actives: alkaline pH (8.0), hydrolyzed vegetal keratine.

PRE PEEL SPRAY

Slightly acidity solution to prepare the skin for acid peeling treatments. It contains an active acid that comforts the skin during more aggressive treatments.

Main actives: 4-t Butylcyclohexanol (TRVP antagonist), pH 4.2
DERMAPEEL PRO

Professional Treatment
BRIGHTENING PEEL SEQUENTIAL SYSTEM
PIGMENTATION TREATMENT

Combination of Glycolic Acids for deep renewing action, with citric acid + phytic acid to reduce the pigmentation.

MICROABRASIVE PEEL
ULTRASOUNDS
Micro-dermoabrasive gel designed to exfoliate the most external layer of the cornea stratum by mechanical action. Cleanses, purifies, and prepares the skin for the treatment with higher penetrating exfoliating agents.
Main actives: Diamond micro-particles.

BRIGHTENING ACID PEEL
Concentrated solution of brightening acids and AHA that activate the natural degradation of the inter-cellular unions of the dermis. Accelerates the renovation of the external layer of the skin and smoothes the micro-relief.
Main actives: Glycolic 35%, Citric 10%, Phytic acids 5% pH3.3

ENZYMATIC PEEL
Enzyme solution which dissolves the main component of the corneocytes - keratine- reducing the thickness of the external layer of the skin.
Main actives: protease, lysozyme.

BRIGHTENING BIOLOGICAL PEEL
Concentrated solution of two biomimetic peptides. Stimulates the renovation of the epidermis in the deep skin layers, softens pigmentation and brightens the natural skin tone.
Main actives: biomimetic peptides DSG and TGF-D in liposomes.

DERMA PEEL PRO
HOME TREATMENT
RESURFACING PEEL CLEANSING GEL

Cleansing and exfoliating gel with a-hydroxy acids and enzymes. Its formula purifies and renovates external skin layer. Use once or twice a week. Not to be applied in eyes or mucous membranes.

ACTIVES:
-Acids 5%
-Glycolic and Lactic acids. pH 4.2
-Protease.

Stop using it in case of irritation
DERMA PEEL PRO

RESURFACING PEEL CREAM/EMULSION

Exfoliating cream with a-hydroxy acids and biological peptides. It stimulates the generation of a epidermis, smoothes and brightens the skin.

ACTIVES:
-Acids 8%
-Gluconolactone, Lactic acid. PH 4.2
-Biomimetic peptides TGF-B (Beta) and DSG in liposomes.
-SPF20

Two different textures depending on skin type.
Normal to mixed skins : light fluid texture
Dry to very dry skins : rich texture

airless dispenser tube 50 ml.

Do not apply in eyes or mucous membranes. Stop using the product in case of irritation. Not recommended for sensitive skins.
DERMAPEEL PRO

PROFESSIONAL TREATMENT STEP BY STEP
Recommended age: starting form age 30.

Skin features: thick and/or photo-aged skin with renovating needs (wrinkles, pigmentation, scars, large pores, etc.)

Recommended product combination: for young skin use POWER C+, POWERHYALURONIC, and POWER RETINOL lines. For mature skin, use antiaging premium lines: ETERNAL, CORRECTIVE and GLOBAL LIFT.
Remove make-up, cleanse and tone the eyes, face and neckline with SKEYNDOR make-up removal product that best suits the skin.

Start the treatment:
**DERMAPEEL PRO TIMELESS/BRIGHTENING PEEL SEQUENTIAL SYSTEM**

1. Apply the **Microabrasive Peel Ultrasounds**. Use a teaspoon amount of the product and spread out with wet hands applying light exfoliant friction movements. Continue working by using a brossage brush to enhance the renovating effect.

2. Optionally you may optionally apply another dose of **Microabrasive Peel Ultrasounds** and use **DP 110 PLUS**. Rinse with abundant amount of water, avoiding contact in the eye area.

3. Spray the **Spray Pre Peel** on your face, neck and specifically on the more sensitive areas. Do not spray directly into eyes.

4. Use a syringe and a bowl to mix 5.0 ml of **Timeless /Brightening Acid Peel** with 2.5ml of **Enzymatic Peel**. Spread the mixture on the face, neck and neckline. Start with the more resistant areas avoiding eye and mucous membranes areas. Leave on from 2 to 10 minutes, depending on skin type, and proceed to remove with abundant amount of cold water.
5. Once again, spray with **Spray Pre Peel** onto the face, neck, and specifically on more reddened skin areas.

6. With the use of a syringe take 5.0 ml of **Timeless/Brightening Biological Peel** product and apply by means of a massage or for more enhanced results use **MESOSCIENCE** by SKEYNDOR. Use the eletroporation current from 5 to 10 minutes (recommended option).

7. Continue with the **Neutralizing Post Peel Mask**. Pour the content of the POWDER PHASE into a mixing bowl and add the TONIC PHASE up to the 40 ml line (see directions on glass). Close and shake well for ten seconds until it turns into a gel. With the use of a spatula apply on face and neck. Be careful with eyes and lips. Remove after ten minutes with abundant amount of water. Make sure to fully remove the product.

8. Finish the treatment with the cream with at least SPF15 that best suits the skin.

**Duration and frequency of use:**
The treatment lasts from 45 minutes to one hour approximately. It is recommended to have a session every 15 days. It is not recommended to have a treatment more than 4 to 6 sessions in a row. You may repeat the treatment after 3 or 4 months if required.

**Warning:**
This treatment contains glycolic acid or a-hydroxy acids. Do not apply in eyes or mucous membranes. Stop using in case of irritation. Not recommended for sensitive skin. Exposure to the sun is forbidden without correct sun protection.
